David's abuse has been going on for me on and off since 1984. First, he acted creepy, touchy, and made suggestive remarks. My first recording with him, I was so uncomfortable he was going to make sexual advances that I dragged my then-boyfriend/current husband along. Since then, I have done multiple recordings with David, and each time he demanded sexual favors at the recording studio.

On 12/14/2017 I sent him a new demo recording. He began to text me after receiving it. After discussing the recording, he started asking if I wanted him, telling me he was "so h**d" and "I want to crawl inside you", wanting to meet me at a hotel. I played along, because I was afraid of professional and personal retaliation. Suddenly, he sent 2 headshots of him and one of him holding his penis. These photos were unsolicited, unwanted, and shocking. I immediately blocked him on all social media and phone accounts. I did not report this as I did not want my husband to know or be hurt. David is a manipulative sexual predator.
